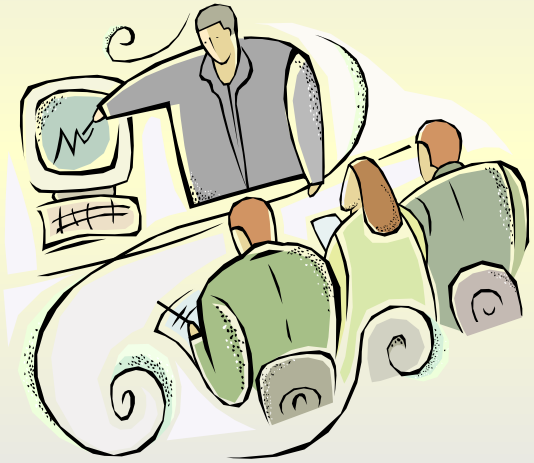
Contract Deficiency Reports

CDRs



"Fly-in" Action

(Continue to Page Down/Click on each page…)

Contract Deficiency Reporting

Contract Deficiency Reports (CDRs) are used to report and resolve identified contract deficiencies.

Contract deficiencies range from conflicting quality requirements to missing long lines of accounting.

Deficiency impacts…

Deficiencies may cause delays in production, shipment and delivery.

Deficiencies may also result in payment delays, erroneous payments and contract close-out problems.

Deficiency Report Format…

DD1716 and CDRs Format

DD1716s, CDRs and Auto-CDRs are all Contract Deficiency reporting mechanisms.

- DD1716 is a deficiency report in PDF form
- CDR and Auto-CDR are deficiency reports captured in data form

In general, data format offers…

- Annotation *(through entire CDR life cycle)*
- Improved assignment
- Enables tracking *(improved query and reporting)*
- Captures audit information

…Many other benefits

CDR Workflow Capability…

CDR Workflow Capability

- *Create, Approve, Assign, Reassign, Return, Accept, Resolve and Close* a CDR
- Query & View CDRs
- Track progress of a CDR
- Capture comments on a CDR
- E-mail notifications sent to interested parties *(Initiator, Reviewing Official, Assignee, & Back-ups)*
- Provide Back-up capability for CDR participants
- Reminders are sent after defined periods due to non–response
- Records audit/status information for entire process
- Driven by CDR Role
  - CDR role *may* be granted to government employees and support contractors with the Contract role
  - Vendors can not obtain CDR role

CDR Business Rules…

CDR Business Rules

- Authorized users may *Create, Approve, Assign, Reassign, Return, Accept, Resolve and Close* a CDR
  - Government users and Support Contractors must be granted the CDR roles
  - Vendors have no access to CDRs
- Deficiencies are selected from a defined list
  - Deficiency text may be added
- Independent relationship between CDR participants enforced *(Exception - Reviewing Official can also act as the Assignee)*
- All CDR participants must be EDA users *(Initiator, Reviewing Official, & Assignee)*
- CDRs require approval prior to assignment *(by Reviewing Official)*
- CDRs require assignment to either the ACO or PCO/Buyer as indicated on the contract
- Days aged begins after *approval* and s
- Contract document is not required to be posted in EDA

CDR Participants...

CDR Participants and Function

The CDR Workflow process requires actions by the following participants:

Initiator – The person who creates the CDR based on errors found within a contract. Typically this has been a DFAS contracting specialist, a DCMA quality assurance specialist or any financial personnel.

Auto-CDR Initiator – The EDA user responsible for administering all auto-CDRs generated by the auto-CDR system and EDA for a specific C/S/A. Typically this person is the Initiator, responsible for reassigning CDRs/auto-CDRs, closing CDRs/auto-CDRs, and creating manual CDRs. All CDR notifications normally routed to the initiator will go to this user.

Auto-CDR System – Interfacing system responsible for delivering the XML contract deficiency data used by EDA to generate Auto-CDRs for a specific C/S/A.

Note: Auto-CDR System User, auto-CDR Administrator, auto-CDR Initiator and auto-CDR Reviewing Official must all belong to the same specific C/S/A.

CDR Participants and Function – Con't

The CDR Workflow process requires actions by the following participants:

Reviewing Official – The person responsible for approving CDRs that are created for a particular C/S/A. The reviewing official is in charge of validating the accuracy of the CDR. Typically this is a supervisor to the initiator.

Auto-CDR Reviewing Official - The person responsible for validating and approving all the auto-CDRs generated by an auto-CDR system for a particular C/S/A.

Assignee – The person responsible for resolving the deficiencies within a CDR. Typically this is an Admin Contracting Officer (ACO) or Procurement Contracting Officer (PCO/Buyer) related to the contract based on the contract's Admin DoDAAC or Issue DoDAAC. The CDR POC of the CDR office (DoDAAC) may also be an assignee.

CDR Participants and Functions – Con't

The following participants monitor CDR activities and will intercede as necessary:

Primary CDR POC – The office's primary CDR POC as defined in the C/S/A within EDA. CDR POCs may be assigned CDRs to resolve or delegate within office.

Alternate CDR POC – The office's alternate CDR POC as defined in the C/S/A within EDA. CDR POCs may be assigned CDRs to resolve or delegate within office.

CDR POC (Mgmt Level) – CDR POC at the C/S/A Management Level. Typically this person acts as a backup to the CDR POC and receives notification of delinquent/escalated CDRs.

CDR Administrator – Government user responsible for setting up the CDR structure and maintaining it overtime. This person is typically the DFAS executive/or appointee to EDA.

Auto-CDR Administrator - Government users who administers the auto-CDR environment for a specific C/S/A. This person is responsible for setting up the auto-CDR Initiator and auto-CDR Reviewing Official for a specific C/S/A and maintaining them over time. (*See EDA Users Guide for Auto-CDR C/S/A Setup instructions*)

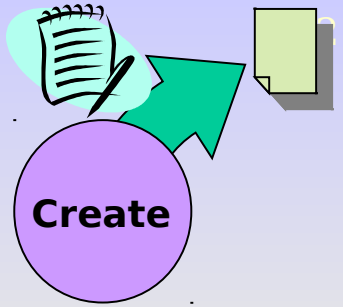
Sample CDR

Let's look at the CDR process…

Create Auto-CDR



Create

Auto-CDRs are created by EDA from XML data sent from an interfacing auto-CDR System. As contract deficiencies are discovered , auto-CDR request are sent to EDA for data validation and auto-CDR creation.

Note: Auto-CDR requests that fail validation will be recorded and returned to the auto-CDR system for correction by the system or the C/S/A designated auto-CDR administrator.

EDA Generates an **Auto-CDR:**

Routed to ***Auto-CDR Reviewing Official*** *for approval*

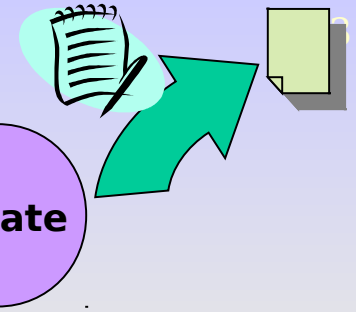
- Must have the Auto-CDR reviewing official role
- Must be in specific C/S/A office to approve

Approved Auto-CDR enters the CDR Workflow in the 'INITIATED' state. Begins CDR Workflow & Audit

Note: Auto-CDRs begin with 'A' and are viewable, queriable and processed like manual CDRs in the CDR Workflow.

Create Manual CDR…

Create Manual CDR



Create

Initiator creates a CDR

- Enters Deficiency information into EDA
  - EDA Pre-populates *(if applicable)*
- Selects & Finds ***Assignee***
  - Indicated on contract (ACO or PCO/Buyer)
  - Assignee must be an EDA user, have the PCO/Buyer, ACO or CDR role
- Selects ***Reviewing Official***
  - Must be in initiator's office to approve
  - Must have the CDR reviewing official role

Note: Contract document is not required to be posted in EDA in order to create a CDR.

Initiator options…

ADD

- EDA saves & submits CDR,
- Notifies Reviewing Official for approval,
- Begins CDR Workflow & Audit

CANCEL

- Nothing is kept, transaction is terminated

Options to Add a CDR…
